**AMENDMENTS TO THE SPECIFICATION**

[0049] 4/24/08

**In light of our discussion during the interview, please replace paragraph [0052] with the following amended paragraph:**

[0052] Embodiments of the present invention may comprise a special purpose or general-purpose computer including various computer hardware, as discussed in greater detail below.

Embodiments within the scope of the present invention also include computer-readable media for carrying or having computer-executable instructions or data structures stored thereon. Such computer-readable media can be any available media that can be accessed by a general purpose or special purpose computer. By way of example, and not limitation, such computer-readable media can comprise RAM, ROM, EEPROM, CD-ROM or other optical disk storage, magnetic disk storage or other magnetic storage devices, or any other medium which can be used to carry or store desired program code means in the form of computer-executable instructions or data structures and which can be accessed by a general purpose or special purpose computer. ~~When~~ Information is may be transferred or provided over a network or another communications connection (either hardwired, wireless, or a combination of hardwired or wireless) to a computer; ~~the computer properly views the connection as a computer-readable medium.~~ Thus, any such connection may be used to transfer data to is properly termed a computer-readable medium. Combinations of the above should also be included within the scope of computer-readable media. Computer-executable instructions comprise, for example, instructions and data which cause a general purpose computer, special purpose computer, or special purpose processing device to perform a certain function or group of functions.
